Eight Opioid Safety Principles for Patients and Caregivers[®]

- 1. Never take an opioid pain medication that is not prescribed to you
- 2. Never adjust your own doses
- 3. Never mix with alcohol
- 4. Taking sleep aids or anti-anxiety medications together with opioid pain medication can be dangerous
- 5. Always tell your healthcare provider about all medications you are taking from any source
- 6. Keep track of when you take all medications
- 7. Keep your medications locked in a safe place
- 8. Dispose of any unused medications
